david,
difference between lines 12 and 14 is male vs female of the 50th percentile.
Same applies for lines 13 and 15.
We've applied no variations in milk fat between each of these simulations.

Sami,

What is the difference between the two rows with the same half-life (lines 12 and 14 or 13 and 15)? Does it vary by percent of milk that is fat?

Dave>>> "Haddad, Sami" <haddad.sami@uqam.ca> 8/18/2009 7:23 AM >>>

Hi David,

Here are the simulation results.

Call me if there are any questions.

Sami
